

LETTER OF RECOMMENDATION

To Whom It May Concern,

I am writing to provide my highest recommendation for **Kanishk Reddy**. As the founder of TaskLabs, I have had the privilege of working closely with Kanishk over the past year during his tenure as an SDE intern and a founding team member of our company.

From the very beginning, Kanishk demonstrated an exceptional ability to grasp complex technical concepts and apply them effectively. He played a pivotal role in developing multiple features for our product, significantly enhancing its capabilities and directly contributing to our rapid growth. For instance, he led the development of a key module that streamlined our user interface, resulting in a 30% increase in customer satisfaction ratings.

Kanishk's strong logical reasoning and problem-solving skills have consistently impressed me and the entire team. He approaches challenges with confidence and creativity, often proposing innovative solutions that others might overlook. His code is not only efficient, but also highly maintainable, reflecting his deep understanding of software engineering principles.

One of the standout qualities of Kanishk is his unwavering commitment to meeting deadlines without compromising on quality. His ability to manage time effectively while juggling multiple responsibilities has been a tremendous asset to our projects. There was an instance where we faced a critical deadline for a client deliverable. Kanishk took the initiative to coordinate with different team members, ensuring that all components were integrated seamlessly and delivered on time.

Although Kanishk excels in many areas, he initially faced challenges with public speaking and presenting his ideas during team meetings. Recognizing the importance of effective communication, he took proactive steps to improve. He attended workshops, sought feedback, and practiced diligently. Over time, he transformed into a confident communicator, even leading several key presentations to stakeholders with great success.

I have no doubt that Kanishk's passion for computer science and his proven technical abilities will make him an exceptional addition to any organization or program. He is eager to expand his knowledge and contribute meaningfully to the field, and I believe he will excel in any environment he enters. I highly recommend Kanishk for any academic or professional opportunity he chooses to pursue, and I am confident that he will thrive in any role.

Please feel free to contact me if you need any further information. I am more than happy to discuss Kanishk's qualifications in greater detail.

Sincerely,

Bhanu Nalluri

Founder, TaskLabs
